

## CK-1 High Quality Protein Powder Filling Packing Machine

This protein powder filling packing machine is the latest machine designed and developed by our company in accordance with the latest national GMP standards. The machine adopts the latest technology, and the design is more reasonable, more concise and more sturdy. Suitable for packaging milk powder, protein powder, talcum powder, spice powder, etc., automatic canning, metering, filling and packaging.

### Features:

1. The screw is driven by a servo motor, which has the advantages of high weighing accuracy, not easy to wear, and stable performance.
2. Adopt advanced PLC control system, color touch screen display.
3. The body and all the parts in contact with the product are made of stainless steel, which fully conforms to the GMP standard.
4. Equipped with a dust removal device, which is connected to the negative pressure pipeline, which can effectively absorb dust during the filling process and effectively protect the workshop environment.

### Technical Data

Model	CK-1
Packing weight	5-5000g (the screw attachment needs to be replaced)
packing accuracy	<±1%
Packing speed	20-35bags/min (Detailed packing speed depends on manual, packaging materials)
Voltage	3P/380V 50-60Hz
Power	1.2kw
Weight	220kg
Size	750×600×1850mm
