

CLM 300 Gummy Candy Depositing Production Line

The CLM 300 Gummy Candy Depositing production line is a complete manufacturing system. It includes an extruder, a forming machine, and a depositing machine, all integrated into one compact unit. This allows for fast, efficient production of high-quality gummy candy. The CLM 300 is perfect for small to medium-sized gummy candy producers who want to increase their production capacity without sacrificing quality or efficiency.

Production Line

- ◆ With its advanced technology and optimized design, this production line is perfect for commercial-scale gummy candy manufacturing.
- ◆ It allows you to produce various shapes and sizes with maximum efficiency and precision.
- ◆ The CLM 300 comes with top-of-the-line components, including an ultrasonic cutter, mixture homogenizer, depositing pump, cooling zone, conveyor belt, vibrating sieve, customized molds, and more. It also utilizes cost-effective designs for improved energy savings without compromising overall performance.
- ◆ Manufacturers can use this production line confidently to ensure high-quality products consistently. With the Sino Fade CLM 300 Gummy Candy Depositing production line at your disposal, making delicious gummy treats has never been easier.

Technical Parameters

Model	Capacity(kg/h)	Candy weight(g)	Machine length(m)	Gross weight(kgs)
CLM 300	300	As per candy size	15	6000
