

Microwave Vacuum Drying Equipment GWD-20B

The Continuously Microwave Vacuum Drying Equipment is very popular and well-sold due to outstanding quality and excellent performance. They are widely applied to drying and sterilizing process in the industries of pharmaceutical, foodstuff and chemical.

Structure & Function

- Composed of controlling unit, microwave heating unit, vacuum system and electric appliances system.
- Intelligent control system makes linear adjustment on temperature and pressure.
- PLC and touch screen adopted in controlling system make operation easy, reliable and efficient.
- Automatic delivering system controls continuous input and output.
- Customized manufactures are available and welcome.

Parameters

Model No.	GWD-20B
Microwave Frequency(MHz)	2450
Total Power(KW)	40
Microwave Power(KW)	20
Water Cost(m ³ /h)	0.5
Productivity(Kg/h)	3-20
Drying Temperature(°C)	30-120
Electricity Supply (V/Hz)	380/50
Size of Shape(mm)	6600x1680x2500
