

## Vertical Vacuum Packing Machine

We are the leading organization in the market to offer the best quality range of Vertical Nozzle Type Vacuum Packing Machine. This product is being utilized to prevent oxidation, going mould, insects or getting damp after vacuum packing, in order to keep fresh/ augment life for long storage. This vacuum machine comes in dispatch control and PCB electric manage system for options. It is simple in process and pneumatically operated. This machine has selectable agenda of vacuum extraction, gas flushing (Optional), sealing and cooling. This vacuum packing machine comes in with double sealing element in order to seal the four layers / gazette type bags.

### Features:

- Robust design and structure
- Low maintenance
- Easy to use and handle

### Application:

- Used for packaging of various food items in an air tight packaging

### Product Details:

Model No.	AVI45
Sealing Length(mm)	40-60 inch, 20-40 inch
Dimension(L*W*H)	960 x 940 x 1800
Voltage(V/Hz)	220/440, 50
Sealing Power (W)	750
Weight(Kg)	255
Machine Type	Automatic, Semi-Automatic
Brand	AVI
Lowest Pressure of vacuum Chamber (KPa)	1
Material for Vacuum Case	Nil
Gas Flushing	Standard
Vacuum pump power (W)	1100
Sealing Width (mm)	10
Chamber	No Limit
Air Charging Volume for Vacuum Pump (m3/h)	20
