

TFP-B3Plus Semi-Automatic Pouch Filling Machine

This Semi-automatic pouch filling machine is OEM designed for our Europe Agent. It can be applied to the quantitative measurement of a variety of powders or fine particles with big dosing 10-25kg such as flour, coffee powder, milk powder, tapioca flour, seasoning powder, chemical powder and other materials. By linking screw conveyor, Sewing machine or Heat sealer, it could set up a semi-auto powder packing line for the open-mouth bags.

Technical Parameters

Model	TFP-B3Plus
Metering Mode	Screw quantitative with weighing feedback
Weight Range	10-25 kg
Packing Accuracy	≤0.3-1%
Packing Speed	1-3 bags/min
Power Supply	380/220 50HZ
Total Power	2KW
Machine Weight	260kg
Hopper capacity	60L
