

## TYB400 Die-forming Lollipop Machine

The line is mainly composed of vacuum cooker, batch roller, rope sizer, lollipop forming machine, transfer belt, 5 layer cooling tunnel etc. This line is characterized by its compact structure, less occupied area, stable performance, less wastage and high efficient production. The whole line is manufactured as per GMP standard, and in accordance with the requirement of GMP Food Industry. Continuous mirco film cooker and steel cooling belt is optional for full automation process.

### Technical Specifications:

Model	TYB400
Capacity	300~400kg/h
Candy Weight	2~18g
Rated Output Speed	Max 600pcs/min
Total Power	380V/18KW
Steam Requirement	Steam Pressure: 0.5-0.8MPa
	Consumption: 300kg/h
Working Condition	Room Temperature: <25°C
	Humidity: <55%
Total Length	20m
Gross Weight	6000kg
