

Full Automatic Rotary OPP Hot Melting Glue Labeling Machine

RELIABLE Rotary OPP labeling machine is suitable for labeling OPP material labels, as the last step of liquid packaging process, it is widely used in beverage, food, chemical and cosmetic industry area. OPP labeling machine adopts modular coating method, which has low rubber consumption and high cost-effective, the principle of the OPP labeling machine is transport the labels by gear and control the system by intelligent system, equipped with label sensor, achieve synchronous matching of labels and bottles, realize labeling process

Technical Parameters

Type		
Labeling data	Label length	10-330mm
	Bottle diameter	50-106mm
Working Data	Glue Temperature	120~160°C
	Label material	OPP feed roll paper
Machine data	Main engine Power supply	AC 3 phase 220-480V
	Main engine Power	6KW
	Junction line error	±1.5mm
	Capacity	Max. 10000BPH
Measurement	Overall Size	2200*1500*2000mm
	Weight	1500KG
