

Automatic water Pouch filling/capping machine CB-3B

This series is widely used in the film packing of milk, soymilk, all kinds of drinks, soy vinegar, yellow wine and water, etc.

Introduction:

- CB-3B is Automatic Water juice bean milk Liquid Packing Machine.
- The machine automatically finish the function of bag making, measuring, filling, sealing, code, counting etc.
- Packing material is single layer PE membrane coils, lower cost than other materials.
- Using liquid pump measuring and filling materials, changing the volume of product by adjust the plunger lift, then fill into the bags, error keeps within 1-2%.At last, finish the bags through former and horizontal & vertical sealer.
- Suit for packing paste product that volume around 5-500ml.
- Machine pack seperated bags.

Features:

- Cooper Sealing Block make the vertical sealing more beautiful;
- Self-priming pump quantitative filling, ultraviolet radiation sterilization;
- The Packing bag is strong and bear the high pressure.

Technical Parameters:

Model:	CB-3B
Capacity:	2000-2400 Bags/hour
Filling Range:	50-500 ml
Accuracy	+/-1.5%
Electricity	220V, 50Hz
Weight:	250KG
Dimension:(L*W*H)	750*750*1750mm
Power	1.5KW
