

## Full Automatic High Quality Tape Type Carton Packing Machine RM-ZX10

Suitable for various shapes of bottle carton packing, automatic bottle carton packing machines widely use in round, square, triangle bottles etc.

After liquid filling, capping bottles and bottle labeling, the carton packing machine as the final step in the chain of manufacturing is products secondary packaging. Reliable Machine offers a wide range of automatic bottle carton packing machines for your needs. Using a secondary packing machinery is essential to protect, store, sell your products in retail displays. This bottle carton packing machine is suitable for carton specifications of the same batch operation, one-time adjustment of carton height and width, continuous operation can be, simple operation, convenient maintenance, that is to reduce the labor intensity of workers, but also improve the work efficiency for the carton packing machine. Suitable for various shapes of bottle carton packing, automatic bottle carton packing machines widely use in round, square, triangle bottles etc.

### Technical Parameters

Type	RM-ZX10	
Output	According to bottle type	10-15PKG/Min
Main power	Power	380v 3Phase / 220v 3Phase 50/60HZ
Air source	Working Air Pressure	6-8Kg/cm
Product application	carton maximum height	780mm
Power Supply	Auxiliary	24VDC
Pressure	Air Pressure	0.4~0.6Mpa
Consumption	Air Consumption	1500L/Min
Control Panel	PLC Control	SIEMENS
Contactors	Contactors&relays	SCHNEIDER
Main machine size	Length width height/weight	3650*1000*1910mm/600kg
